

Same 50 states and positions in both panels

2016-2020 averages; the same four example states are labeled in each panel

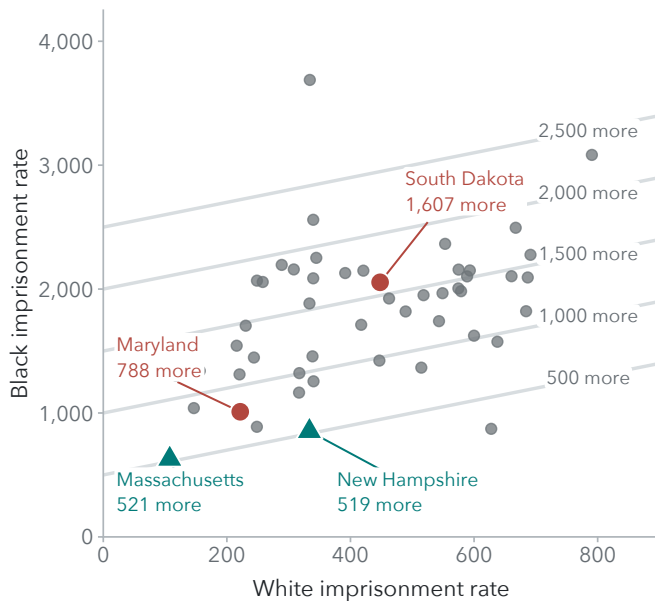

A Relative disparity (ratio)

How many times the White rate?

B Absolute disparity (gap)

How much higher than the White rate?

Rates and gaps: per 100,000 residents aged 15-64. Gray lines mark equal ratios (A) or equal gaps (B).

Colored labels report each example state's value on that panel's measure. Lines are reference values, not fitted trends.
